

TOWN OF WASAGA BEACH

WATER METER TRANSMITTER REPLACEMENT PROGRAM

The Town of Wasaga Beach Public Works Department has initiated a Water Meter Transmitter Replacement Program. Not every property in your area will be targeted for a replacement.

There is no cost to homeowners or occupants, and the installations will be completed by our Contractor WAMCO.

The program consists of the deactivation, removal, replacement and reactivation of the water Meter Transmitter Unit (MXU). The MXU is a beige rectangular shaped device, located on the outside of your dwelling unit.

WAMCO staff will be removing and replacing the MXU without interruption to your billing process and in most cases, without the need to obtain access into your dwelling. Should WAMCO staff members encounter any issues with the system, and require access into your dwelling, they will leave a door hanger on the dwelling unit door. Should you receive a door hanger, please follow the instructions displayed on the door hanger and contact the identified phone number as soon as possible.

Should you require further information regarding the Water Meter Transmitter Replacement Program, please contact Public Works at 705-429-2540.
